

Science at St Thomas More

"Try to be like Jesus in all that we think, do and say"

Science at St Thomas More enables children to become successful **learners**, **loving** individuals, **prayerful** individuals and team **players** through imparting key working scientifically skills and knowledge.

Learn

We increase pupils' knowledge and understanding of our world, and develop skills associated with science as a process of enquiry.

Pray

We reflect and develop a respect and understanding of the world God has created. This will draw on understanding of creation and will encourage children to raise philosophical questions about the creation of Gods' world.

Love

We respect and love our world including living organisms and the physical environment and develop an understanding of how to love themselves through a healthy lifestyle in addition to the wider love they will develop for the world.

Play

We share opportunities with others and develop a deep understanding of the subject and strive to ensure we work as a team for the good of all.
